PROFESSIONAL SUMMARY

FinTech-educated IT professional with hands-on banking experience as an IT Support Intern at Acleda Bank and a strong foundation in multi-tier application architectures. Skilled in core banking workflows, SQL database querying (PostgreSQL, MySQL), user access control (RBAC), and technical incident troubleshooting. Proven capacity to support and maintain mission-critical financial software, demonstrated by engineering an end-to-end Online Banking System featuring KYC verification, fund transfers, and transactional audit trails. Dedicated to ensuring high system availability, transactional integrity, and rapid operational support for Cambodian Public Bank.

TECHNICAL SKILLS

Banking & Application Support	Core banking workflows, KYC verification queues, Transaction & ledger tracking, Audit logging, User Access Control (RBAC), Helpdesk incident management, UAT testing
Databases & Querying	PostgreSQL, MySQL, Redis, SQL querying & data verification, Schema migrations (Flyway)
Infrastructure & Systems	Docker, Linux, Windows 11 workstation deployment (Ventoy, Rufus), Nginx, Cloudflare Tunneling, Local networking & cabling diagnostics
Programming & Tools	Java 21 (Spring Boot, Spring Security), TypeScript (React), Python, Dart (Flutter), RESTful APIs, Swagger/OpenAPI, Git, CI/CD Pipelines

PROJECT EXPERIENCE

Online Banking System (OBS) — Spring Boot, PostgreSQL, React, Flutter, Docker

- Engineered a full-scale multi-tier banking platform comprising a Java Spring Boot REST backend, PostgreSQL ledger, React administrative back-office portal, and Flutter mobile client.
- Implemented core operational workflows including customer onboarding with camera-based KYC document verification and an admin approval/rejection review console.
- Designed robust account management and fund transfers with transactional integrity, automated PDF statement generation (PDFBox), DevSms 2FA, and granular Role-Based Access Control (Teller vs. Admin).
- Maintained transactional audit logging and standardized error response models, facilitating efficient application debugging, support triage, and data reconciliation.

Restaurant POS & QR Ordering System — React, TypeScript, Spring Boot / Node.js, Cloudflare

- Developed a production-ready ordering and POS solution featuring unique tokenized QR codes for secure customer ordering without session collision.
- Built a comprehensive administrative management dashboard for real-time menu updates, inventory tracking, and differentiated role permissions for Admin, Cashier, and Kitchen staff.
- Configured Cloudflare Tunneling and reverse proxies to reliably expose locally hosted servers to external traffic with secure SSL/TLS termination, eliminating public port vulnerabilities.

WORK EXPERIENCE

IT Support Intern — Acleda Bank | Jun 2026 – Present

- Provide daily IT helpdesk and technical operational support across banking workstations, swiftly troubleshooting hardware, operating system, and application connectivity issues.
- Standardize and deploy secure Windows 11 operating systems across branch machines utilizing bootable deployment tools (Ventoy, Rufus) in adherence with bank IT guidelines.
- Diagnose and configure local physical network cabling, IP addressing, and secure departmental file-sharing to ensure reliable daily operations.

EDUCATION

Acleda University of Business — Bachelor's Degree in Financial & Technology — 2023 – Present

COMPETITIONS

University Venture Capital 2026 — Finalist — Top 6 Qualified Team
